Islamabad, Pakistan | +92 3190550890

qudduslarek@proton.me | quddus.is-a.dev | github.com/quddus-larik | linkedin.com/in/quddus-larik

SUMMARY

Full Stack Engineer who also designs front-end systems for scalable, user-focused products. Skilled with Node.js, TypeScript, MongoDB, and PostgreSQL; CodeSignal certified. Builds robust APIs and shapes front-end architecture, reusable components, and performance-minded UI flows that rely on solid backend design. Delivers clear, testable server code and data structures to support smooth interactions and cross-team collaboration.

EDUCATION

Fuuast University, Islamabad (**BSCS**)

Expected Fall - 2026

Islamabad gov.t collage for boys F - 7/3 (**ICS | HSSC - I & II**)

May 2024 - June 2026

RELEVANT EXPERIENCE

open source contributions and experiences

Opensource Contributions

- I Collaborate on OpenSource with a contributors on an innovation project like ReactBits through GitHub to build a highly flexible customization component library to improve low code frontend development and CI/CD Pipeline implementation
- codeAlpha - intern (1 month) June 2026 - July 2026**

- I learnt backend implementation with Node.js frameworks like ExpressJS, MongoDB and pgSQL Databases connection
- Build Backend for Frontend Frameworks like ReactJS, HTML, CSS, JS with client side caching and centralized store like Redux Toolkit and Zustand
- RestAPIs Testing with tools like Postman. JWT based authentications providers with ExpressJS middlewares

DevelopersHub Corporation - Full Stack Web Developer

(3 months) March 2026 - May 2026

- I get many experiences with teams and collaborations on projects includes NextJS, ExpressJS and UI libraries.
- Code changes with Branching and Pull Request. Backend Hosting on Render and RestfulAPIs.
- Technologies: NextJS 16, API handling and Middlewares, Clerk Auths, SupabaseDB with ACID implementation.

SKILLS

Development:

HTML, CSS, Javascript, Typescript, Python, SQL, NodeJS, AstroJS, ReactJS, NextJS, ExpressJS, NestJS, Git, Clerk Auth, JWT

Deployment & Database:

MySQL, Postgresql, MongoDB, Redis (basics), Netlify, Vercel, Render, Azure (Basics), Supabase, MongoAtlas, Railway

Libraries / Frameworks / AI Agentics:

SCSS, Tailwindcss, Unwindcss, MotionJS, Shadcn UI, HeroUI, MaterialUI, Zustand, WebSockets, LangChain, LLM APIs Integration,

Testing / Tools / Platforms:

Playwright, Vitest, Figma, Framer, Spline, Github, Github Actions (basics), Postman, ClickUp, Notion

PROJECTS

Postfolio(NodeJS Package): (Typescript, MDX, NodeJS, NPM)

- Opensource lightweight MDX(Markdown and XML) static site generator for NextJS that provide inbuild blogs based on local .mdx files and dev.to blogs. It support markdown and xml support natively through markdown engine.
- It is mainly build for web based Portfolios were it provide blogs in one place. It means viewer deosn't go third party blog provider's site like dev.to, medium and others to read it. ([Github](#))

TinyGround(SaaS): (Typescript, Python, FastAPI, ReactJS, NextJS, LangChain)

- Opensource web based languages playground or compiler for demo purpose that support 40+ programming languages.
- It provide quick demo for languages so, it gives idea about languages without setup compiler locally. ([Github](#))

oneManage(SaaS): (Javascript, ReactJS, NextJS, Supabase, Postgrsql, ShadcnUI)

- It is a employee management system build for small indutries that provide tasks, quick emails, departments, expenses and HR management in one. ([Github](#))

Language: Conversational English, Native Urdu
